MEMORANDUM FOR: Deputy Director for Plans & Management, OS
FROM: [REDACTED]
Special Assistant to the DDA
SUBJECT: Request for File Search

1. The Agency is committed to a search for persons who may have suffered lingering aftereffects as a result of their having been participants without their knowledge in drug testing and experimentation sponsored by the Agency. We do not know the identity of any of the subjects of the testing and will have to reach them through the persons and institutions that conducted the research. Review of the available files has revealed the names of a number of institutions and persons that apparently were involved in the experimentation in one way or another. We need to know the nature and extent of their relationship with CIA, if any, and when it occurred; names of Agency employees and organizational components involved in whatever relationships may have existed; any cryptonyms or other data that may be useful in developing more detail about the relationships; any information available that will be useful in determining present whereabouts; and any other information you feel may be useful for the purposes of this search.

2. The names of persons of interest are attached. The institutions of interest are:

[REDACTED]
e. New Jersey Neuropsychiatric Institute
f. Butler Health Center (Providence, R.I.)

I am enclosing copies of the records available to the Agency pertaining to its support of research at McGill. The University had no objection to the acknowledgment by CIA of its involvement in this activity. I trust it will alleviate Mrs. Orlikow's concerns to learn that she was not subjected to this treatment as a result of support furnished by this Agency.

Very truly yours,

Assistant General Counsel
